

Glaze Price Summary

Date	2026-07-04
Last Updated	2026-07-04
Document Version	1.0
Generation Model	Claude Sonnet 5
Author	Jake Yeager

This is the current per-lb cost of every glaze recipe tracked in `db/glazes.db`, regenerated directly from it via `scripts/generate_price_summary.py` — a quick reference for pricing/rotation decisions, not a one-off analysis. Regenerate it (and re-run `scripts/price_batch.py` first if you want fresher prices) before sharing an updated copy with stakeholders. “Last Priced” is the oldest `last_verified` date among a recipe’s ingredients — the number is only as fresh as its stalest ingredient. A recipe with unpriced ingredients shows its total computed from confirmed ingredients only; it is not a guess, but it is incomplete.

Mid Fire glazes

Glaze	\$/lb	Batch Weight (lb)	Total Cost	Last Priced	Notes
Frogskin	\$2.27	107.00	\$242.71	2026-07-04	
Giggin’ for Salvation	\$2.27	115.50	\$261.94	2026-07-04	

Raku glazes

Glaze	\$/lb	Batch Weight (lb)	Total Cost	Last Priced	Notes
Looks Expensive	\$4.63	106.30	\$492.57	2026-07-04
